DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 7-9 and 16, drawn to an apparatus for utilizing hydrogen peroxide vapor and ozone gas, classified in class 162, subclasses 78 and 65.
 - II. Claims 10-12 and 13-15, drawn to a sterilization method by utilizing hydrogen peroxide vapor and ozone gas, classified in class 422, subclasses 29 and 34.
2. Inventions 1-9, 16 and 10-15 are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatuses as claimed can be used to perform process other than sterilization or decontamination as required by the method claims; for example for bleaching pulp material.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
